GPSM 513 GENDER AND DISASTER MANAGEMENT

1. Using a gender theoretical perspective, evaluate the achievements made by any African country to fulfilling the Sendai Framework for Disaster Risk Reduction 2015-2030 in increasing the health resilience to pandemics.
2. 'Reporting in disaster logistics is important to providing gender disaggregated data for influencing gender sensitive policy in developing countries'. Discuss.
3. Examine the relevance of the disaster management cycle to influencing implementation of disaster risk reduction policy in Zimbabwe.
4. Analyse the applicability of the SMART approach to gender sensitive disaster management interventions.
5. Evaluate the role of international organisations in combating the prevalence of water-borne diseases such as cholera in any African country.
